EDUCATION

BS	De La Salle University, Computer Science Specialization in Software Technology	September 2021 - Present
-----------	---	--------------------------

HONORS AND AWARDS

Out of the Box Award	2022
-----------------------------	------

It is an award within the organization for a team of LSCS Junior Officers for organizing an innovative event that fostered a positive atmosphere by applying the skills gained in the Junior Officer Training Program.

St. La Salle Financial Assistance Grant	2021
--	------

De La Salle University provided a financial assistance grant to selected Filipino scholars.

ORGANIZATIONS

DLSU Computer Science Government, 2021-2022

Executive for Project Management manages the planning, execution, and maintenance of initiatives for organizations that serve the students at the college.

La Salle Computer Society, 2021-2022

Junior Officer members undergo the Junior Officer Training Program, which consists of various training, workshops, and committee deployment as preparation for becoming future leaders of the organization.

DLSU Association for Computing Machinery Student Chapter, 2023-Present

Associate for Activities Committee organizes research and applied computing events to advance the chapter's objectives and coordinates with the stakeholders to organize the events.

ACTIVITIES

2022 Frosh Convocation

Facilitated the annual convocation to welcome the first-year students of the College of Computer Studies and provide them with an overview of college life, different activities, and organizations.

“Ready, Set, Type!”

Created, planned, and facilitated a CCS event for the LSCS members to compete in fast typing and promote a friendly environment.

SPARK 2022

Organized and conducted a three-day annual flagship event that featured a range of seminars and a creativity competition designed to expose high school students to diverse fields within the College of Computer Studies.

Thesis Networking Event 2024

Organized and facilitated a networking event in preparation for students who will have their thesis to connect with other students with research interests and formulate new ideas for their thesis topics.

PROJECTS

Portfolio Website – <https://imameliajoyce.github.io/>

- A hard-coded personal website using HTML and CSS and github.io as a domain to host the website that includes personal information, previous solo and group projects as a primary course requirement, and some social media account links.

Discusso – <https://discusso.onrender.com/home>

- A forum website application aims to promote inclusivity among users so that they can discuss diverse topics they desire with full-stack development implementation using CSS, HTML, NodeJS, NPM, and Mongoose.

FINSI – <https://github.com/ImAmeliaJoyce>

- A project management tool exclusively made for a company, FINSI, to manage various projects over the Philippines with full-stack development implementation using CSS, HTML, NodeJS, NPM, and Mongoose.

BagBuddy – <https://bagbuddy.onrender.com>

- An application that seeks to become the go-to app for modern travelers who want an innovative and efficient way to prepare for their journeys. It is developed by implementing Figma, HTML, CSS, Javascript, NodeJS, Express framework, Jest, Mongoose, and GitHub Actions.
